DOCTOR-PATIENT RELATIONSHIP IN CHIROPRACTIC
INFORMED CONSENT

CHIROPRACTIC
It is important to acknowledge the difference between the health care specialties of chiropractic, osteopathy and medicine. Chiropractic health care seeks to restore health through natural means without the use of medicine or surgery. This gives the body maximum opportunity to utilize its inherent recuperative powers. The success of the chiropractic doctor's procedures often depends on environment, underlying causes, physical and spinal conditions.
It is important to understand what to expect from chiropractic health care services.

ANALYSIS
A doctor of chiropractic conducts a clinical analysis for the express purpose of determining whether there is evidence of Vertebral Subluxation Syndrome (VSS) or Vertebral Subluxation Complexes (VCS). When such VSS and VSC complexes are found, chiropractic adjustments and ancillary procedures may be given in an attempt to restore spinal integrity. It is the chiropractic premise that spinal alignment allows nerve transmission throughout the body and gives the body an opportunity to use its inherent recuperative powers. Due to the complexities of nature, no doctor can promise you specific results. This depends upon the inherent recuperative powers of the body.

DIAGNOSIS
Although doctors of chiropractic are experts in chiropractic diagnosis, the VSS and VSC, they are not internal medical specialists. Every chiropractic patient should be mindful of his/her own symptoms and should secure other opinions if he/she has any concern as to the nature of his/her condition. Your doctor of chiropractic may express an opinion as to whether or not you should take this step, but you are responsible for the final decision.

INFORMED CONSENT FOR CHIROPRACTIC CARE
A patient, in coming to the doctor of chiropractic, gives the doctor permission and authority to care for the patient in accordance with the chiropractic tests, diagnosis and analysis. The chiropractic adjustment or other clinical procedures are usually beneficial and seldom cause any problem. In rare cases, underlying physical defects, deformities or pathologies may render the patient susceptible to injury. The doctor, of course, will not give a chiropractic adjustment, or health care, if he/she is aware that such care may be contraindicated. Again, it is the responsibility of the patient to make it known or to learn through health care procedures whatever he/she is suffering from: latent pathological defects, illnesses, or deformities which would otherwise not come to the attention of the doctor of chiropractic. The patient should look to the correct specialist for the proper diagnostic and clinical procedures. The doctor of chiropractic provides a specialized, non-duplicating health service. The doctor of chiropractic is licensed in a special practice an is available to work with other types of providers in your health care regime.

RESULTS
The purpose of chiropractic services is to promote natural health through the reduction of the VSS or VSC. Since there are so many variables, it is difficult to predict the time schedule or efficacy of the chiropractic care. Many medical failures find quick relief through chiropractic. In turn w must admit that conditions which do not respond to chiropractic care may come under the control or be helped through medical science. The fact is that the science of chiropractic and medicine may never be so exact as to provide definite answers to all problems. Both have made great strides in alleviating pain and controlling disease.

TO THE PATIENT
Please discuss any questions or problems with the doctor **before** signing this statement of policy.

I have read, and understand the foregoing.

FINANCIAL AGREEMENT
WORKER'S COMPENSATION INJURY

Shipley Chiropractic - 2292 West Magee Road, Suite170 - Tucson, AZ 85742
(520) 797-2922 Fax (520) 742-0732

We would like to take a moment to welcome you to our clinic and to assure you that you will be receiving the very best care available for your condition. To familiarize you with the financial policies or our clinic, I would like to explain how your medical bills will be handled.

Party Responsibility
If you were involved in an auto accident and are the owner of the vehicle, we will bill the medical insurance portion of your own automobile insurance policy. If you were ***a passenger in someone else's car***, we will bill the ***driver's*** auto insurance company. These policies will be billed in addition, and prior to, any claim that your attorney may be presenting to an insurance company on your behalf.

Insurance Rates
It is important to remember that when a medical claim is submitted to the "medical payments" portion of your insurance policy, your standing with the insurance company will not be affected, and your rates will not normally be increased, unless the accident is determined to be your fault.

Billing Other Insurance Policies
It is also to your advantage for our clinic to bill your own health insurance policy and/or automobile medical policy for your medical bills, providing your policy does not state otherwise. Any money received above and beyond your total bill in this clinic will be refunded to you.

Responsibility for Payment
As a courtesy to you, we will gladly submit your medical bills to your insurance company(ies) and/or attorney; however, all services rendered by this clinic will be charged directly to you, and ultimately, you will be personally responsible for payment of these bills regardless of any settlement you may or may not receive.

Once again, we welcome you to this clinic. We hope that this has answered any questions that you might have about our financial arrangements. If, at any time, you have further questions about your care, please don't hesitate to ask.

I have read and agree to the above
